Stay current with the latest version of VPR™ software

The latest version of Veterinary Pharmacy Reference (VPR) software, version 2.6 Release 9i is enclosed. To stay current with pharmacy standards and new drugs, install your new update as soon as possible. If you need assistance installing the update, please contact us at 1-800-695-2877.

Installing your update

Your new update installs quickly (10 minutes or less). Install the update on all servers and workstations that have VPR software loaded. For best results, exit all open software applications before you begin.

1. Uninstall your old version of VPR by doing the following:
   - If you're using Windows® 7 or Windows Vista®:
     a. Click **Start** in the lower left of your screen.
     b. Click **Control Panel > Programs and Features.**
     c. Select **VPR - Veterinary Pharmacy Reference**.
     d. Right-click and select **Uninstall/Change**.
     e. Follow the prompts to complete the uninstallation process.
   - If you're using Windows® XP:
     a. Click **Start** in the lower left of your screen.
     b. Click **Settings > Control Panel > Add or Remove Programs**.
     c. Click **VPR - Veterinary Pharmacy Reference**.
     d. Click **Remove** or **Change/Remove**.
     e. Follow the prompts to complete the uninstallation process.
2. Insert your version 2.6 Release 9i CD in your CD-ROM drive.
3. When the *Welcome* window is displayed, click **OK** if you closed your software applications before starting the install; otherwise, press **Alt + Tab** and close the applications now, then click **OK**.

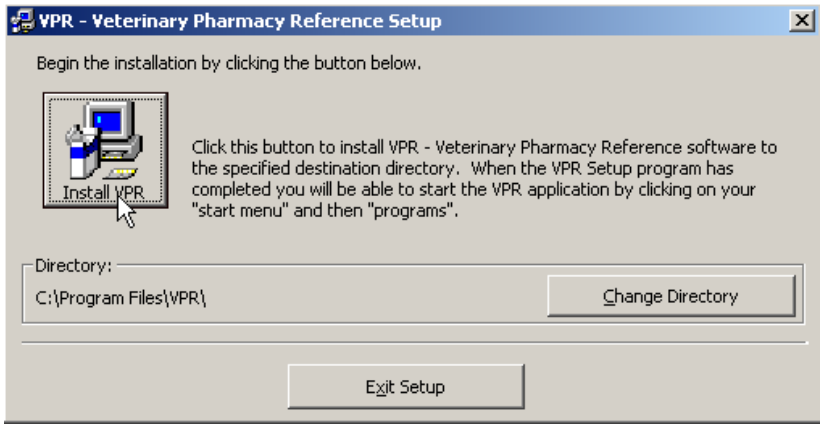
   If the *Welcome* window doesn't appear automatically:

   a. Click the **Start** button and select **Run**.
   b. Type the letter of the DVD drive followed by **:\setup.exe** (e.g., d:\setup.exe) and click **OK** to open the install program.
   c. Click **OK** if you closed your software applications before starting the install; otherwise, press **Alt + Tab** and close the applications now, then click **OK**.

Continued

4. Click the **Install VPR** button to start the installation.

   Note: We do **not** recommend that you change the directory.



5. The software license agreement is displayed; click **Accept** to continue with the installation.
6. At the *Program Group* window, click **Continue**. Because staff are familiar with the current program group name, it is best to continue without changing the name.
7. Click **OK** when the *Veterinary Pharmacy Reference setup was completed successfully* message is displayed.
8. When asked to reboot your system, click **Yes**.
